-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 7-13, drawn to a method of forming a cutting edge on a dispensing carton with the steps of forming a tape having a polymeric backing coated with an adhesive comprising an EVA hot melt adhesive, classified in class 156.
 - II. Claims 21-25, drawn to a method of forming a cutting edge on a dispensing carton, wherein the carton blank comprises a front panel, a bottom panel, a rear panel and a lid, classified in class 229.
 - III. Claims 26-27, drawn to a dispensing carton with a tape cutting edge, classified in class 225, subclass 34.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). For example, the combination as claimed does not require the particulars of the subcombination as claimed because the combination could be made and used without the subcombination's carton blank with a front panel, a bottom panel, a rear panel and a lid. The subcombination has separate utility such as it

Art Unit: 3724

could be used without the step of forming the tape and using the EVA hot melt adhesive.

3. Inventions of Groups I/II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). For example, the product as claimed can be made by another and materially different process such as a process not having the specific steps of forming a tape having a polymeric backing and using an EVA hot melt adhesive.\

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

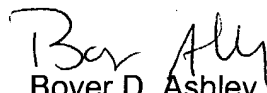

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Boyer D. Ashley whose telephone number is 703-308-1845. The examiner can normally be reached on Monday-Thursday 7:30-6:00.
